BLACKHAWK

All the current features are table stakes. The icing on the cake...or sidewall in this case, is the sidewall protector ribs on the BAR26SP & BDR28SP. The addition of sidewall protector ribs, to help withstand abrasion and cuts caused by curb damage, improves the durability of these tires. This added feature will help to increase tire life and the ability to retread the worn casing to lower your overall tire cost. This is critical in the high-cost Last Mile Delivery environment where these tires are utilized. The sidewall protector ribs provide an additional 3mm (4/32") of rubber in 2 ribs that cover the circumference of the sidewall. Lower your operating cost and improve tire life by using our tires with Sidewall Protector Ribs.

BAR26SP FEATURES

- Long wearing
- Durability
- Stability
- Water evacuation

BDR28SP FEATURES

- Traction
- Durability
- Stability
- Mud and Snow evacuation
